

Dewan Shakil Akhtar

hi@mrdsa.dev | mrdsa.dev | github.com/imdewan | linkedin.com/in/mrdsa04

Full-Stack Engineer with 4+ years building production SaaS and mobile apps. Worked as founding engineer at Nool Books building a book reselling marketplace from 0 to production, recently attended Network School in Malaysia. Built Soyfin budget app with AI chat and created rn-pdf-decrypt npm package for on-device PDF decryption in React Native. Strong in Next.js, Node.js, Go, Flutter, Expo, and Convex.

PROFESSIONAL EXPERIENCE

Member of Technical Staff

Apr 2026 - Present

Stellon Labs Inc · San Francisco Bay Area (Remote) · YC-backed

Tech: React Native, Flutter, Android (Kotlin/Java), TypeScript, Web SDK, CI/CD, TTS

- Built and launched the KittenML platform to production as sole engineer, covering the full stack including UI/UX, analytics implementation, and iteration based on real usage data
- Set up scalable infrastructure with auto-scaling and CI/CD pipelines for the platform and all four cross-platform SDKs (React Native, Flutter, Web, Android)
- Built a mobile SDK CI/CD pipeline that runs automated tests on real physical devices on every PR and generates a detailed test report
- Designed and shipped KittenTTS SDKs from the ground up, covering audio pipeline, lifecycle management, benchmarking, documentation, and developer onboarding

Founding Engineer

July 2025 - March 2026

Nool Books

Tech: Expo, React Native, Convex, Stripe Connect

- Architected and developed full-stack book reselling marketplace from concept to production-ready mobile app
- Engineered geospatial query system for location-based discovery and implemented Stripe Connect for transactions
- Built real-time notification system and successfully submitted to App Store in 4 months

Backend Engineer, Contract

Contract Role

Fluent.ph

Tech: Next.js, Neon DB (Postgres), TypeScript

- Architected complete backend infrastructure using Next.js and serverless Postgres (Neon DB)
- Designed database schema and built RESTful API endpoints enabling rapid feature development

Freelance Full Stack Developer

June 2020 - June 2024

Freelancer.com

Tech: Flutter, PHP/MySQL, Python, Firebase, React

- Delivered 10+ client projects including web platforms, mobile apps, and automation solutions with 100% satisfaction
- Developed IoT dashboard for solar generation units with real-time energy metrics and Python-based PDF extraction system processing thousands of records
- Created restaurant reservation system with dual Flutter apps integrated with Firebase and Cashfree payments

Full Stack Developer Intern

March 2023 - June 2023

Solar Curtain

Tech: PHP, MySQL, Flutter, REST APIs

- Designed and implemented RESTful API backend for solar energy monitoring with data aggregation
- Developed cross-platform Flutter app with interactive data visualizations and real-time energy metrics

KEY PROJECTS

Zepper - Open-Source Private Browser for macOS (mrdsa.dev/zepper)

Tech: TypeScript, React, Chromium, CSS, Apple Intelligence

- Built and released a free, open-source (GPL-3.0) Chromium-based browser for macOS with Spaces, split view, a command bar, and a sidebar built for tabs, shipping on Apple silicon and Intel with auto-updates
- Implemented privacy protections that are on by default: ad and tracker blocking, fingerprinting noise, cross-site cookie isolation, HTTPS upgrades, and secure DNS
- Set up a prebuilt-Chromium workflow so contributors can fork and run the browser in minutes using only TypeScript, React, and CSS

Soyfin - Budget Tracking App

Tech: Expo, React Native, Convex, Clerk

- Built comprehensive budget tracking mobile app with AI-powered chat assistant for financial insights
- Implemented real-time data sync with Convex and secure authentication using Clerk
- Created rn-pdf-decrypt npm package for on-device PDF decryption in React Native (didn't exist at the time)

Coldpen.io - Cold Email Campaign Platform

Tech: Next.js, DuckDB, Supabase, Clerk, Redis, Bull MQ, Node.js

- Built complete SaaS platform for launching targeted cold email campaigns without marketing complexity
- Implemented distributed email processing with Redis and Bull MQ handling thousands of concurrent emails, achieving 30+ waitlist signups

Ledref.com - Newsletter Design & Distribution Platform

Tech: Next.js, Supabase, Redis, Bull MQ, Gemini API

- Built newsletter platform with Notion-style block editor and scalable email distribution system using Redis queue architecture
- Documented development journey in YouTube series "\$0 to \$10k" for educational content

Website Builder (Wix Alternative)

Tech: Python, Django, React, MySQL

- Developed full-stack web application with Django REST API and React frontend
- Integrated GrapeJS for drag-and-drop website building features

Waste Management App

Tech: Flutter, Firestore, Firebase

- Developed cross-platform Android/iOS app using Flutter framework
- Implemented Firebase Firestore for database and Firebase Auth for authentication

PG Search Platform with Maps Integration

Tech: Node.js, React, MySQL, Google Maps API

- Built location-based accommodation search platform with interactive maps for finding PG housing
- Implemented custom authentication system and RESTful API with Node.js backend

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Go, Python, PHP, Dart, C/C++, SQL

Frontend: React, Next.js, Flutter, React Native, Expo, HTML/CSS

Backend: Node.js, Express, Go (Gin), Django, Convex, REST APIs

Databases: MySQL, PostgreSQL, Supabase, Firestore, DuckDB, Redis

DevOps & Tools: Docker, Git, AWS, GCP, Firebase, Coolify, Vercel

Specialties: Queue Systems (Bull MQ), Payment APIs (Stripe, Cashfree), Geospatial Queries, AI Integration, Cross-platform SDK Development

LEADERSHIP & COMMUNITY

Network School Resident

Dec 2025 - Feb 2026

Forest City, Malaysia

- Participated in Network School (ns.com) popup city program focused on building, networking, and entrepreneurship

Chief & Cloud Lead - Google Developer Student Club

- Organized technical workshops (quantum computing, international Git workshop) and led Cloud Jam events training students on GCP
